Program (II)

Dear Fellow Colleagues,

As of today, our patients expect more and more excellent, predictable and reliable results as regards to function, esthetics and phonetics. Furthermore, the goal of a healthy oral cavity and thus, an enhanced general health status, are a clear focus of patients in today's modern dental practices.

Over the last few years, dental medicine itself has undergone substantial changes as well. Most successful dentistry can be achieved, if dental professionals collaborate with great respect for each other. Such a team approach unites general dentists with dental specialists, general physicians with specialized medical doctors, as well as dental hygienists and dental technicians. Last but not least, partners in business and industry have become crucial team members in an attempt to transfer all dental knowledge into financial success in a modern business environment.

Nowadays, there is an abundance of information that dental professionals are faced with. Thus, it has become very difficult to selectively analyze all available data in our business environments. Therefore, all DSI® Continuing Education Events are based upon a unique doctrine over all fields of expertise, and most importantly, on Biological Principles which build the solid foundation of all areas of interest. Finally, such a biological basis allows predictable and reliable results which can directly be transferred into our successful daily clinical practices.

As a new format, this Continuing Education Event will allow for a maximum of interactive discussion and learning experience, both theoretically as well as practically, across all fields of expertise. In addition, the topics from Monday throughout Friday are chosen in analogy to a chronological order of a regular patient treatment.

Thus, the DSI® Winter Academy will provide you with a unique opportunity, to even further indulge into several comprehensive fields of professional daily interest in a nice, personal and sophisticated atmosphere.

We are excited to welcoming you soon in Saas-Fee and remain in the meantime with our very best regards –

Sincerely yours
